“THE STRENGTH OF A CENTURY.” At Olsson Roofing Company, Inc. we have built our business on being one of the most respected, safety conscious, and trusted roofing & architectural metal contractors in the Midwest. We specialize in commercial and industrial roofing solutions, which cover a wide range of size, complexity and profiles. We employ over 200 professionals representing our new construction, re-roof, service and maintenance and architectural metal divisions. We are licensed, certified and held in the highest regard with all major manufacturers. With years of knowledge and expertise in single ply, built up, modified, green roof, restorative, standing seam and composite based systems, Olsson Roofing Company, Inc. is your single source solutions provider.

Our Service & Maintenance Division offers 24 / 7 emergency response to expeditiously address and remedy any immediate roofing related issues. We receive numerous call requests per year, ranging from general roof repair and maintenance, manufacturer’s warranted and non-warranted system repairs, coatings, roof and metal restoration, to mechanical flashing and curb work as well as roof proactive and preventative maintenance. Our dedicated service and maintenance crews are devoted to delivering consistent assessments and excellent communication, every roof, every time.

Our New Construction & Re-Roof Production Divisions offer diverse solutions through our project management staff, utilizing the most up-to-date manufacturer specifications and training. We deliver these attributes while collaborating with general contractors, project consultants, building engineers, and private building owners. We consistently research, update and employ the latest safety processes, equipment, and OSHA safety guidelines to maintain a safe and successful job site for our field crews, clients and surrounding environmental conditions.

Our Architectural Metal Division offers a variety of architectural sheet metal solutions including roof metal installation, replacement and repair options. We install insulated metal wall and roof panel systems, metal plate, composite panel cladding, rainscreens, column covers, architectural louvers, metal panel sound attenuation, pre-manufactured canopies, skylights and roof screen systems. We also specialize in coping, fascia, gutter, drainage, cornice, finials, wall, siding and soffit components.

Our commitment is to deliver the best possible roof and metal solution at the lowest responsible price, on time, safely, with the highest quality, to all of our clients. We strive to maintain our position as the market’s first choice, while working with our clients to provide single source valued solutions.
