Overview of who we are:

- Link to our website: <https://www.d-7roofing.com/>
- We have a strong track record over more than 25 years. Our extensive experience translates into top quality, reliable, and stress-free roofing for both commercial and residential clients.
- One of the largest new construction roofers in all markets where we have an office.
- Long Term Warranties: Our long-term success relies on our client's satisfaction, so we offer some of the strongest and longest warranties in the industry.
- Our roofers are employees, NOT sub-contractors. We all undergo thorough training and carry the Technician Seal of Safety, ensuring the best service on every project.
- We have over 700 employees across all markets.
- d-7 Roofing is a preferred provider for the industry's largest materials manufacturers, such as Owens Corning, GAF, ELK, and Tamko, as well as being a certified installer for National Big Box Retailers and an EPA Lead-Safe Certified Firm.
- We use a LEAN production approach across our entire company. This increases efficiency, drastically decreases waste, and reduces all of our costs. The cost savings created by LEAN production is directly passed on to our clients.
