BEFORE INSPECTING:

Be sure the employee entering the roof has proper OSHA training, fall protection, ladder safety training, and safe roof practices. Know where hazards exist.

IF YOU EXPERIENCE:

- **Any** signs indicating a roof blow-off...
- **Any** signs your roof deck is damaged or uncertainty of it's condition...
- Bad weather or high winds...
- Incomplete safety training...

...**Do not** allow any employee to access the roof.

Contact a professional.

WHAT TO LOOK FOR

● Rips, Holes, Cracks or Splits

Harsh weather conditions, falling debris, foot traffic, organic matter or any other items on your roof can cause damage to your roof membrane.

● Ponding Water

Heavy rains, melting snow & ice can cause drainage back-ups, failures and standing water.

● Loose Fasteners

May show up as bumps in your roof, can be difficult to identify

● Flashings

Protective flashings around seams, rooftop units, mechanical equipment or roof transitions can become loose or separated.

● Roof Blow-Off

High winds, extreme weather or even poor workmanship can cause the roof membrane to become separated from it's substrate.

● Roof Leaks

Water infiltrating your building

COMPANY PROFILE

We recognize that no two roofs are ever the same. Our expert team thoroughly observes the existing condition of the entire roofing system and all individual components to determine the most cost-effective solution. In addition to individually addressing any noticeable problem areas, our technicians focus on the integrity of the roofing system as a whole to ensure that our custom solution is safe, sustainable, and cost-effective for many years to come.

Carlisle SynTec Systems Names Bloom Roofing Systems Inc. to 2024 Perfection Council

(CARLISLE, PENNSYLVANIA) – Carlisle SynTec Systems, a leading manufacturer of single-ply roofing materials, has named Bloom Roofing Systems Inc. to its 2024 Perfection Council. Their history of exceptional roof installations and excellent warranty claim performance make Bloom Roofing Systems Inc. one of only 40 Carlisle Authorized Applicators in North America invited to sit on Carlisle’s 2024 Perfection Council.

As a Perfection Council member, Bloom Roofing Systems Inc. will serve on an advisory board that helps Carlisle determine how to best support its Authorized Applicator network throughout the upcoming year.

“It’s a pleasure to recognize Authorized Applicators whose highest priority is providing exceptional workmanship on every roofing project,” said Kevin Somers, Carlisle’s Director of Sales. “Because Bloom Roofing Systems Inc. shares Carlisle’s commitment to excellence, their input is invaluable in improving Authorized Applicator support programs,” Somers continued.

To qualify for Perfection Council, Carlisle Authorized Applicators must complete a minimum number of warranted jobs and install a minimum amount of warranted square feet per year. Perfection Council members are then selected based on installation quality, warranty claim performance with the lowest incident ratings, and their commitment to perfection and quality on every Carlisle installation.

About Carlisle SynTec Systems: Carlisle SynTec Systems, headquartered in Carlisle, Pa., has been manufacturing single-ply membrane roofing systems for more than half a century. Carlisle SynTec Systems is a business segment of Carlisle Construction Materials, LLC, and has manufacturing facilities in Carlisle, Pa., Greenville, Ill., Senatobia, Miss., and Tooele, Utah. For more information, call 800-479-6832 or visit www.carlisesyntec.com.

Standard Service Agreement

Bloom Roofing Systems, Inc. is a full-service commercial and industrial roofing provider specializing in replacements, inspections, repairs and preventative maintenance services.

Bloom's non-binding service agreement provides your business hassle-free access to inspections, preventative maintenance, and urgent repairs, getting service to you more efficiently. As a Bloom Roofing customer your service call will be streamlined within our system, equipping you with qualified techs and service faster.

By providing the following information, your business will become a preferred customer allowing our service department to expedite your call and provide estimated service times. Estimated times and charges subject to change based upon actual service time and materials used on service call.

Service Call Labor Rates:

- \$98.00/man-hour—Standard Hourly Rate
- \$124.00/man-hour—Overtime & Saturday Rate
- \$150.00/man-hour—Sunday & Holiday Rate
- All Service Calls are charged from port to port
- Minimum service fee of \$495
- Two technicians are required for safety & efficiency purposes

Unless a written quote has been provided, standard service rates will apply. All service calls are charged at time and material (T&M) rates, plus truck stock. All service calls require a signed quote, purchase order or a completed \$1,000 credit card authorization prior to commencement of any work. Material charges will be itemized on your invoice. Truck stock material is charged at a flat rate of \$60.00, and includes garbage bags, rags, minor patching material and other common items used during a standard service call.
